

ACCEPTABLE FILE FORMATS

We are happy to accept any of the following file formats and disk types. Software changes incredibly frequently, so it's best to call us before you start work to check which versions we support. If your application or media type isn't listed, please call us.

Please always **send us the native file from your application**, not an **EPS** or **PDF** file, and make sure it is clearly labelled. To avoid confusion, it would be helpful if your disk contained only the relevant files you want printing.

WHAT TO DO NOW

We want your file to print the way that you want it to print. And more than anything else, we want you to be happy with the work that we produce for you. So, if there's anything at all that you don't understand – give us a call (preferably before you start designing).

Chances are, if you've followed our advice (and remember, we've seen thousands of disks in our time – we know what works and what doesn't), then your file probably will print just fine.
